General and Revenue Secretariat | File No. 36 of 1937 | [App. F. III—2

Serial No. 1

From the Director of Agriculture

No Roc 1499/34-35/L.A. 223 dated 23/11/37

Requests sanction authorising him to discard such of the biological products of the Serum Institute proved inactive and to write off incidental wastages also subject to submission of a Quarterly statement of biological products discarded by him for the information of Govt

I further details the proposal is to delegate to the Dir of Agriculture the power to discard such of the biological products that proved ineffective & to write off incidental wastages. Why the sanction of Govt should not be obtained in such cases is not known. Further details may perhaps be called for with a view to see if the delegation of the power asked for is necessary. A draft covering is put up for approval or other orders.

30 NOV. 1937

To

M. Venkatanaranappa, Esq., B.A.,
Secretary to the Government of H.H. the
Maharaja of Mysore, Development Department,
B a n g a l o r e.

Sir,

Subject:- Discarding of biological products in the Mysore Serum Institute, H e b b a l.

---

In connection with the preparation of Biological products in this institute, I have the honour to state that there are two important factors that render the biological products ineffective. They are (a) Contamination in respect of virus (b) In-activeness of Sera and Vaccine, owing to long storage.

Contamination:- It is only in the case of producing Rinderpest virus, that contamination renders virus inactive as the virus is fresh blood drawn from the animals at the height of Rinderpest reaction and no antiseptic of any kind could be added as preventive agent. As such the virus blood is very susceptible to contamination in the course of its preparation. For these reasons it has been found by experience that it will be very hard to detect at what stage the virus gets contaminated. This defect cannot ordinarily be remedied, in spite of the best pre-cautionary measures being adopted in the course of its preparation, nor is this kind of contamination been avoided so far in other institutions of this kind.

With regard to Sera and Vaccine, contamination seldom renders the product in-efficient as antiseptics are used to prevent contamination and that such a contingency is a negligible factor in the preparation.

As the preparation of most of the biological products with the exception of virus requires about 2 to 3 months, it is imperative that these products should be stocked and made available in suffi-

p.t.o.

cient quantities to meet the demands both from outside and in the State. These products can also be preserved for over a year in the refrigerator. Consequently there is not much risk attended with the stocking of Sera and Vaccine and there may not be any possibility of their becoming ineffective. The production of these products generally depends upon the demand.

The Virus on the other hand becomes ineffective during a short interval and cannot be preserved long. It requires at least a week's time for its preparation. This product lasts for a week only during which period it should be used. So neither the indenting Agency nor the producers can stock this product for a long time. It is therefore incumbent on the part of producers to possess potent stock of virus always to meet the needs of the public.

I am therefore of opinion that in the case of a scientific institute like the Mysore Serum Institute where large quantities of virus, Sera and Vaccine are produced sufficient margin towards wastage and incidental losses should be allowed in the course of preparation for the reasons advanced above as such wastages are inevitable. Even if there should be any such losses or wastages the same are being reported to me for sanction.

It is hardly proper to fix up a percentage of unavoidable losses in this regard in the absence of any definite data to estimate the wastages or losses as the case may be in as much as they vary at each time of the preparation and their occurrence is mostly accidental.

I have been writing off such wastages and losses incidental to the preparation of each product. With a view to regularise this procedure, I request that you will be so good as to obtain sanction of Government authorising me to discard such of the products proved inactive and to write off incidental wastages also subject to submission of a Quarterly Statement of Biological products discarded by me for the information of Government.

The favour of an early order is requested in the matter.

I have the honour to be,
Sir,
Your most obedient servant,

Director of Agriculture.

To

M. Venkatanaranappa, Esq., B.A.,
Secretary to the Government of H. H. the
Maharaja of Mysore, Development Department,
Bangalore.

SIR,

With reference to your letter No.D.4309/C.V.36-37-3 dated 15th December 1937, calling for certain information about the biologicals discarded in the Mysore Serum Institute, I have the honour to forward herewith a detailed statement showing the quantities written off and discarded during the last five years and to state as follows:-

As already reported, in a Scientific Institute like this where large quantities of biological products are produced sufficient margin has to be allowed for discarding a reasonable percentage of them as an inevitable factor in the manufacture of Virus, Sera and Vaccines.

Prior to 1934 and ever since the Institute was started, some quantities of Virus were being discarded (i) as contaminated and (ii) as having become inactive due to storage for want of indents, and such quantities were being written off in the Institute as a matter of routine. Regarding Sera and Vaccines, discarded quantities were being reported to this office for write off. Now all biological products proposed to be discarded are being reported to this office.

Since such wastages and losses incidental to the preparation of each product are being written off, I sought sanction to regularise the existing procedure. If every case of such write off is required to be reported to Government for formal sanction, it will no doubt involve much avoidable correspondence, since such wastages and incidental losses accrue every week and they have to be written off as a matter of routine without attaching any money value.

I therefore request that Government may be pleased to sanction my

P.T.O.

5

proposal authorising me to order the discard of such of the biological products proved to be inactive and to write off the losses and incidental wastages.

I have the honour to be,
Sir,
Your most obedient servant,

Director of Agriculture.

A/J.

Statement showing the quantities of Biological Products discarded and written off due to contamination, for want of indents etc., during 5 years from 1932-3.

| Products. | Years. 1932-33 | 1933-34 | 1934-35 | 1935-36 | 1936-37 | Remarks. |
|---|---|---|---|---|---|---|
| 1. Rinderpest Bovine Virus | 9587 ozs. | 1108 ozs. | 2166 ozs. | 393 ozs. | 279 ozs. | The figures given under Virus (both Goat and Bovine) represent the quantities discarded for want of indents in time as well as due to contamination etc. But the quantities noted under other products represent only the wastage at due to breakages while bottling and arranging, there being no discarding either due to contamination or for want of indents in time. |
| 2. Rinderpest Goat Virus | *21700 cc. | 23950 cc. | 21615 cc. | 12240 cc. | 20145 cc. | |
| | *(Experimental Production). | | | | | |

REVENUE SECRETARIAT. 30 OCT. 1938 DEVELOPMENT BRANCH.

FROM

T. G. RAMA IYER, ESQ., B.A.,
DIRECTOR OF AGRICULTURE IN MYSORE,
BANGALORE.

To

M. Venkatanaranappa, Esq., B.A.,
Secretary to the Government of H.H. the
Maharaja of Mysore, Development
Department, Bangalore.

SIR,

With reference to your letter No. D. 269/C. V. 36-37-4 dated 13-7-38, re: the delegation of powers to discard such quantity of each of the biological products of the Serum Institute as being time-barred etc., I have the honour to invite kind reference to my letter of the 23rd November 1937 detailing the circumstances in which the discarding is being done and to state as follows in respect of certain additional information called for by Government.

1. Treating separately the losses due to want of receipt of orders and due to contamination:

It is very rarely that Sera and Vaccines get contaminated and these products can be preserved effectively for over a year. In the case of Virus, however, it is possible that the product may get contaminated in spite of all possible precautions being taken. Such a chance contamination even, has of recent years been rare. In the alternative, there is therefore a perceptible loss under Virus due to want of timely indents for this product. It has already been sufficiently explained how the virus cannot be prepared as and when indents are received and hence there is the need for keeping this product always in sufficient stock to comply urgent requirements and demands from unexpected quarters. As such, the classification of the losses separately as indicated may not be serving any purpose in the circumstances stated.

2. Suitable limit - money or otherwise - to write off such losses to be fixed:

Sera and Vaccines are seldom discarded either due to contamination or want of indents. During the past five years no

p. t. o.

no quantity of these products has been discarded except a few instances of losses on account of wastage due to accidental breakages in bottling and loss in transit etc. As regards Virus, it is not possible to fix any definite percentage of losses to be written off under it, as no definite and fixed quantity of the Virus could be manufactured in the absence of any regulated demand for this product. However, I request that Government may be pleased to fix tentatively a limit of 10% in the case of Sera and Vaccines and 50% in respect of Virus - both Goat and Bovine - any case of variations over these percentage limits being reported for the orders of Government.

3. A Statement showing separately the quantities of each of the biological products discarded during the past 5 years with their money values is herein enclosed for favour of information.

I have the honour to be,
Sir,
Your most obedient servant,

B. Sanjiva Rao Bahadur.
for Director of Agriculture.
on tour
